

Making employee health care even more convenient and affordable

Your employees now have access to more walk-in clinics

Treating minor injuries and illnesses doesn't have to mean hours or even days of lost time for your employees.

Walk-in clinics can simplify and speed up care. No referrals are needed, and the only cost is the PCP copay. For **more coordinated care**, most in-network walk-in clinics will share clinical data from a visit with the member's primary care doctor.

The in-network walk-in clinics can help with:

- Minor illnesses (flu, infections and body aches)
- Minor injuries (blisters, burns, wounds and minor sprains)
- Screening and monitoring (asthma, diabetes and high blood pressure)
- Skin conditions (Minor infections, rashes, sunburn and poison ivy)
- Wellness and physicals (pregnancy testing, weight evaluations)*

Find out more about our additional, in-network walk-in clinics at [aetna.com](https://www.aetna.com).

** Most wellness and physicals are no cost to member.*
